

Generating Captions in Indesign

(when editors set captions in Photoshop)

- Place photo
- Right click on photo
- Select 'Captions' > 'Caption Setup...'
- Indesign Caption Setup:

Verify what field the editors are using in PS. Some use 'Title' and some use 'Headline'

This needs to be set up in every new layout file, but once you set it up on the first photo all others will work.

- Once setup, then right click on photo
- Select 'Captions' > 'Generate Static Caption...'

NOTE: If no TITLE or HEADLINE was entered, there will be an extra black space before the cutline you can delete.
